Projects

● HexaCart

React | MongoDB | TypeScript | Stripe | Firebase | Axios | Tailwind Css

Crafted a robust MERN e-commerce site for effortless shopping experiences. Gained expertise in MongoDB, Express.js, React.js, and Node.js, implementing advanced features. Directed end-to-end development, delivering a scalable solution exceeding client expectations.

Frontend Code   Backend Code   Live Site

● Proxima

MongoDB | Express.js | React.js | Node.js | JWT | Tailwind CSS

Created a user-friendly todo app for easy task organization and management. Gained expertise in JWT and was able to create a secure authentication method without using any third-party tools like firebase and clerk.

Frontend Code   Backend Code   Live Site

● EventHorizon

NextJS | TypeScript | MongoDB | Shadcn UI | Clerk | Uploadthing

Crafted a cutting-edge web application leveraging Next.js, TypeScript, MongoDB, Shadcn UI, Clerk, and Uploadthing. Seamlessly integrated tools to ensure efficient development and user-friendly experience. Exceeded expectations by delivering a robust, secure, and feature-rich solution.
